Improving Language Competency through Capacity Building in Spoken English

Capacity-building in spoken English was organized to develop student oral competency to various speaking activities based on workplace case scenario and to enhance student level of confidence as they are engaged in different type of communication events.

Online capacity building program was organized from Nov 23rd to Dec 2nd 2020.Microsoft- team was used for registering students interested in the program, 463 students registered for the program out of which 65% were male and 35% were female. They belongs to UR (32.61%), OBC (39.3%), SC (13.6%) and ST (14.5%) categories.

The students from almost all the streams and degree program registered for this module. Out of 463 registered participants 47.1% from B.Sc. agriculture followed by M.Sc. Ag. (16.6%), B. Tech (14%) and Ph.D. (10%) program

Students were evaluated through a test prior to program through multiple choice question. Total 90 question were framed to evaluate candidates. Test was also conducted on the last day of the training to judge the performance in terms of improvements.

70 participants appeared in test1 prior to the program out of which 38 participants obtained more than 50% marks while 20 obtained 50 to 60%, 17 obtained 61 to 70% marks. In post program test II, 58 candidates participated out of which 45 obtained more than 50% marks, 16 obtained 50 to 60%, 19 obtained 61 to 70% and 9 obtained more than 71% marks. . The participants have shown in significant improvement in mass as well as individually.

In both the test 19 participants were common and 14 participantsout of them have shown10 to 20% increase in marks and remaining are within 10%.

On the day one out of 463, registered candidate only 175 attended the training and later on it was reduced to almost half (97). This trend was continued and on the last day of training only 27 candidates attended the course. This is major cause of concern. In spite of this, the improvements in regular participants have shown an enthusiasm for further continuation of such program.

As for as feedback is concern out of 56 response were recorded majority them reported that the content of the module were Good (62.5%) and Excellent (33.9%).This module was useful for their professional development (78%).

Distribution of Participants
