

Training– CAPACITY BUILDING & TRAINING			
NAHEP-CAAST-CSDA			
Date of Training	13.11.2021	Time	1.00 pm to 3pm
Minutes Prepared by		Location	KVK, JNKVV, Jabalpur.
1. Training Topic:	Removal of pesticides from Vegetables		
Lecture by	Dr. S. B. Das Professor, Department of Entomology, JNKVV, Jabalpur)		
2. Attendees Coordinator - Dr. S. B. Das, Nodal officer (ESP)			
3. Course Summary	Dr. S. B. Das spoke to the audience about how pesticides are present in the veggies we eat on a daily basis and how they act. Pesticide residues in our food could come through the application of pesticides to crops, with residues lingering in fruits and vegetables, or from the use of pesticides to clean dwellings. Pesticide residues, once in our bodies, can cause a variety of acute and chronic illnesses. As a result, eradicating pesticides as much as possible is the first step forward.		
4. Sum – up Discussion with participants	Participants learned how to clean veggies before using them in cooking and what precautions should be taken. They use a CBT session to explain various pesticide removal procedures from vegetables in an integrated manner. Then, during the discussion, a few of them asked about the methods and how dangerous they were to us. Participants also had questions about the hazardous effects of various pesticides and their safety, which Dr. S. B. Das adequately answered. The students regarded the lesson to be quite valuable and successful in general.		

Date	Speaker (Designation &Organisation)	Theme / Topic	Participants attended			Impact
			Total	Female	Male	
13.11.2021	Dr. S. B. Das Professor, Dept. of Entomology, JNKVV, Jabalpur	Removal of pesticides from Vegetables	36	0	36	Student got information regarding “safe use of pesticides. Got answers for What should be done with empty containers once pesticides are used? They are aware of this and have gained expertise. Reusing pesticide containers is dangerous and not advised.

						Some pesticide containers, on the other hand, may be regarded too valuable to be discarded after use. The material of the container and the contents determine whether it is appropriate for cleaning and reuse. The label should include advice on how to reuse the item and how to clean it.
