About the Training Programme

21 days training programme on Holistic Development of Students is going to organize by Dean Student Welfare J.N.K.V.V., Jabalpur under NAHEP Project.

Holistic development helps in developing intellectual, mental, physical, emotional, and social skills that are critical to success in the career arena of everyone. The Workshop is solely conducted for the agricultural Students for strengthening the basics of personality. The purpose of this workshop is to know how to work well in teams, effectively manage time and projects, think critically and creatively, and be agile in times of change with maturity and dedication. With Soft Skills being the need of the hour, we are taking the initiative to hold workshops to help aspiring students to hone their soft skills. The intent is to also to enlighten these young minds about the importance of soft skills in their professional life

Objectives of Training Programme

1. To develop an understanding of physical, mental, emotional, and social skills to meet the demands and challenges of daily life.
2. To impart professional skills for overall development of personality.
3. To assist the students to jolt start a bright and expounding career.
4. To impart knowledge on communication skills required for professional growth and development.

Learning approach in Training Programme

Lecture cum Discussion, Psychological tools & online resources along with experience sharing allow to interact with content using both online and classroom-based environment. The workshop is divided into five modules. The 5 modules are: Module-I: focused on Philosophy Aspect, Module-II: Health Aspect, Module-III Communication Aspect, Module IV: Contemporary Agricultural Education Aspect, and Module V: Social Aspect

The first module on Philosophy aspect helps to understand how one's knowledge, skill and attitude will lead to development of winning personality. Equipped adequately with these three dimensions, student can deal with real time issues in prompt manner and the response to uncertainties & problems will be professional.

The importance of physical and psychological well-being for the healthy growth and development cannot be underlined. Physical activity found to have a beneficial effect on mental health. It is therefore very important to take into account the nutritional and lifestyle factors while addressing mental health challenges among the young. The second module thus focuses on holistic management strategies on health aspect. Effective communication skills are fundamental to success in numerous aspects of life. The significance of building good communication at a young age is critical in their growth and future learning. The third module is therefore committed on Communication aspect, which includes speech and non-verbal communication, soft skills, computer skills and ways and means of effective presentation.

The training programme also help the students to have knowledge about the basic, applied and contemporary scenario of Agriculture and allied sciences as agriculture is one of the most diversified fields than ever before, offering several jobs and self-employment opportunities to agriculture students. Agricultural technology is not only advancing at fast pace but also creating new job opportunities for agriculture students. The fourth module thus devoted to Contemporary Agriculture education aspect.

To achieve economic and social objective there is need of societal up gradation, which ultimately presupposes some level of emotional maturity & access to appropriate knowledge & know how. The fifth module emphasise on social aspect, which includes awareness programme for women empowerment, leadership quality and the rights and duties as an individual.

This Holistic programme is solely dedicated to our students; therefore we are looking forward for your sincere participation.
